Study and Investigation

Dr. Mohammed bin Ahmed Barhaji

**Al-'Elam Fi Ahkam Al-Idgham by the Erudite Scholar, Sheikh
and Imam, Ahmad bin Muhammad bin Muhammad bin Al-
Jazari (Died around 835AH)**

This concise treatise is related with the recitation of the Holy Qur'an and it is very vital in its field. Besides that it deals on the science of Qur'an recitation, it also has the

honour of being a book on Phonetics, and it is connected with the language system. This is how the importance of the topic is derived.

The research plan began with the introduction after which comes the preface comprising of the introduction of Al-Idgham (Assimilation) and the paramount books authored in this science, biography of the author-May Allah have mercy on him- confirmation of the ascription of this book to him, explanation of its theme and scientific value. This was followed by introduction to the two copies of the book upon which I relied during the investigation work. Then I investigated the text of the book and developed the necessary index according to the common methodology of scientific investigation.

Based on my work in the investigation of this book, I realized that it comprised of the phenomenon of assimilation and its rules in poetic form and its explication where the author wrote the book in poetic form in 22 stanzas from Ar-Rajaz poetic meter and then he explicated the verses in brief. He also illuminated those reciters that were known for using some aspects of the assimilation style. Moreover, this scientific poem is brief, well composed and cursive to benefit a student of Al-Qira'at (Science of Qur'an Recitation) in the understanding of the chapter of

assimilation among scholars of Qur'an recitation and consolidated study of its rules.

The author's explication of the scientific poem gives it a good scientific value in the sense that the author i.e. Ahmad Ibn Al-Jazari, is more knowledgeable of how to explicate his poem and express its meanings, since he is an erudite scholar in the science of Qira'at and a son of the chief of investigative scholars in this science, Muhammad Ibn Al-Jazari, May Allah bestow mercy upon both of them and reward them in the best manner for their service to His book (Qur'an).

I implore Allah to render it beneficial, make it solely meant for seeking His noble Countenance, and preserve it in our scale of good deeds; for He is the Master of that Who is Capable of doing that and He is Sufficient for us and He is the best Patron. All praise is due and belongs to Allah by whose blessings all righteous deeds are accomplished.
