Conditions of Reflection Holy Quran and its Obstacles

Dr.Khaled B.Othman Elsabt

Reflection is a relative issue in which people vary, and it varies within a single person in his / her different conditions because of the difference in its introductions. Reflection requires achieving its conditions and canceling its barriers. Collecting reflections needs an accepted place – which is the living heart– and the work which is done by the designee (reading or listening with the presence of the heart), with a degree of understanding to what's being read or listened.

So, the person should be ready to read by noting the appropriate time and situation for reading, discharging his/her soul of concerns which confuse the mind, and choosing what makes one reflect it which is reciting the Quran and pausing at the verses that affect his/her heart when reciting.

The reader should keep in his mind while reading the greatness of the reciter of the Quran, and that he addressed us through it in order to comply.

It is a book of guidance, and a way of life. It descends on the reality, and addresses individuals and nations. So we should accept it willingly and honestly, give it great

importance, and spend the most honorable time reading, studying and doing what it wants us to do.

We should also abandon all the obstacles that prevent reflecting it, which are sins and misdeeds, engaging one's self in different kinds of nosiness, or what might be there in our souls of deficient perceptions and concepts which prevent us from reflection, and other various obstacles; Allah knows best.

The researcher explained one part of limitations related to these texts.

These limitations resulted from the poor language of the writer.

This ignorance of checking and revising texts might lead to many oral differences, that also lead to, in later stages , practical differences in addition to the effect of weak linguistic structures which affects the scholars and children .

The article showed the concern of earlier scientists towards their checking and revising of their works.

In the second part of the research , the writer presented a practical application on "Tuhfat Al-Atfal in Tajweed".
